517311 – Wired Telecommunications Carriers

DIFFERENTIATORS

- Certified Minority & Women Owned
- 20+ Years IT Solutions in Hospitality Industry
- 20+ Years in Design / Build Consultation
- 15+ Years in Medical Hardware Installation
- Strong Vendor Relationships for Max Client ROI
- Superior & Consistent Performance
- Seasoned Management Team
- Provide IT Solutions to Choctaw Nation
- Operate in Government, Healthcare, Education, Religion, Media, Marketplace & Hospitality Industries

CORE COMPETENCIES

Low Voltage & Communications Infrastructure

- Installation and integration of CIC (Communications Interface Cabinets) and SES (Signal Equipment Shelters)
- Fiber optic splicing, testing (OTDR), and termination for secure and high-speed data transfer
- Structured cabling systems for SCIF, admin offices, transit hubs, and remote government facilities
- Design/build for secure communications systems (voice, data, video, intercom) in accordance with FISMA and DoD standards

Public Transit & Transportation Systems (e.g. DART)

- Turnkey communications support for public rail and transit infrastructure, including the DART Silver Line project
- Programming and installation of IP-based surveillance, emergency call, and transit signaling systems
- Installation and testing of transit fiber backbones, control cabinets, and communications panels
- Ongoing collaboration with prime contractors, city agencies, and transportation authorities

Healthcare, VA & Medical Facilities

- Experience with VA hospitals, DoD medical sites, and federally funded clinics
- Integration of OR A/V systems, medical boom installations, and digital infrastructure
- HIPAA-compliant low-voltage systems: nurse call, patient tracking, secure Wi-Fi
- Coordination with medical OEMs (e.g., Stryker Medical) and facility architects

Government Security & Surveillance Systems

- Deployment of access control, CCTV, perimeter security, and intercom systems at secure facilities
- Design and install of intrusion detection and video analytics per federal requirements
- Integration of systems for DoD, Homeland Security, and critical infrastructure projects
- Experience working with secure protocols and controlled site access

Technical Site Services & Engineering

- Site surveys, infrastructure assessments, and field engineering for federal installations
- Development of as-built documentation, compliance checklists, and test reports
- OSHA 10/30 certified field technicians and project leads
- Veteran workforce with direct experience in military/federal work environments

CAPABILITY STATEMENT
